

**The Minnesota Lath & Plaster Bureau  
Invites you to attend**

**“EIFS Design 101”**

**AIA/ CES Continuing Education Program #MNLPB1**

This seminar counts toward one learning unit for Health Safety & Welfare

This presentation was concocted from a perceived need. In my twelve years of experience with a nationally known EIFS manufacturer, one of my duties was to review contract documents for conformance with the manufacturer's and industry standards.

Over the course of the years I typically saw the same common detailing concerns occurring on several different projects. This seminar then is an attempt at addressing those concerns. This is a very visual presentation that complements our handbook of the same name.
