

“Understanding Lath Components Used in Stucco”

AIA/ CES Continuing Education Program #MNLPB6
This seminar counts toward one learning unit for Health
Safety & Welfare

Description – Don't know your weep screed from your casing bead? How about the difference between a control joint and an expansion joint? If not, we can help with this informative basic presentation on stucco components and detailing. This presentation is based upon our *Lath Inspection Resource Manual*. This new 25-page publication is full of information that will help you make sound decisions for building projects with stucco cladding.
